DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1 and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 in lines 11-13, recites the limitation “by assigning channels to user applications, wherein multiple user applications can be assigned to a channel, and to demultiplex an externally provided signal” which is not supported by the disclosure.

Claim 13 in lines 11-13, recites the limitation “by assigning channels to user applications, wherein a channel can simultaneously transmit signals of more than one user application” which is not supported by the disclosure.

2. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 in lines 6-7, “modulating signals based on a type of the communication signal and then demodulating signals provided from the main controller” renders the claim indefinite because the modulated signals and the demodulated signals mentioned above seems to refer to the same signals, and the drawing and specification do not seem to support that.

Claims 29-30 are rejected since they are dependent from base claim.

Art Unit: 2665

Allowable Subject Matter

3. Claim 20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims 1-30 have been considered but are moot in view of the new ground(s) of rejection.
